SUMMARY

Unity developer with 5+ years of experience building production VR and cross-platform applications. 3 years at Caterpillar shipping client-facing VR marketing tools and training simulators across Android VR (Vive Focus 3), desktop, iOS, and WebGL. Comfortable working directly with customers to deliver to spec.

TECHNICAL SKILLS

Engine: Unity (5+ years), Unity Animation Editor, Profiling & Optimization
Languages: C#, Object-Oriented Programming, LINQ, Async Programming
Platforms: VR (Vive Focus 3), Android, iOS, Desktop, WebGL
Specialties: Virtual Reality, UI Systems, Shader/Lighting Scripting, 3D Model Manipulation
Tools: Git, WPF, Database/Server Integration, CI/CD, Android SDK

PROFESSIONAL EXPERIENCE

Unity Developer — Applications Team

~3 Years (Remote)

CAT Visual / Caterpillar Inc.

- Shipped 6+ production VR and desktop applications for Caterpillar mining equipment visualization
 - Architected reusable VR codebase enabling rapid delivery across 6060, MD6310, and 7495 product lines
 - Built Android Side Loader (WPF) adopted team-wide for deploying apps to VR headsets via USB
 - Implemented UI systems including minimap/overhead tracking for autonomous mining trainer (MineStar)
 - Developed VR interactions: drill lift/lower mechanics, auto-leveling systems, simulated camera materials
 - Built 320 Hex Life Extended desktop app — interactive part-swapping for sales and informational use
 - Resolved critical Android build pipeline issues, unblocking the entire applications team
 - Worked directly with customers to gather feedback, iterate on features, and deliver to specification
-

PERSONAL PROJECTS

Fly Girls	2D side-scrolling shoot-em-up with boss battles, teleport dodge, leveling system. Unity WebGL.
Slender Escape	First-person horror maze game. Navigate dark corridors and avoid the monster. Unity WebGL.
Warehouse FPS	First-person shooter with weapon switching, reloading, and gun upgrading system. Unity WebGL.
